TRANSPORTATION FOR WASHINGTON CITY,

Baltimore, Philadelphia,

HIS GREAT WORK OF INTERnal improvement (379 miles from Wheeling to
Baltimore, and 403 to Washington,) was opened to the
Ohio river in January, 1855, and has now been fully
sated and approved, both as a freight and passenger
route. This road is located in a romantic country, is
solidly constructed, fully equipped, and carefully
managed, and is thus rendered an attractive as well as
a safe line for travelers. The late completion of the
Central Ohio Road, from Columbus to the Ohio river,
near Wheeling, adds greatly to the importance of this
route, offering, as it does, the most therough Railroad
connection with the entire West.

connection with the entire West.

THE ONLY THROUGH TICKETS BETWEEN LOUISY-LILE AND THE NATIONAL METROPOLIS are sold by this road, which runs direct to Washington without the delay of passing through Baltimore. AN ORDINANCE efit of the Lebanon Branch of the Louisvill and Nashville Railroad Company. SEC. I. Be it ordained by the General Council of the City of Louisville. That whenever the Louisville and Nashville Railroad Company shall have graded, bridged, and shall have ready to put down the necessary timbers for the reception of rails, and fully prepared a section of fifteen noiles of their Lebanon branch road from its intersection with the main trunk line, in a good and of fifteen miles of their Lebanon branch road from in intersection with the main trunk line; in a good and substantial manner, with good materials for putting on the iron rails and equipments, and the General Council shall be satisfied of these facts (and that said section of any part thereof is not subject to any lien whatever), after having had a report thereon, made upon a personal examination of said section, from a committee consisting of the City Engineer, the President of the Board of Aldermen, and the President of the Board of Councilmen, or such other committee as the legislative authority of said city shall designate—then, the General Council shall, by resolution, require the Mayor to issue to said Company coupon bonds of the city of Louisville, having thirty years to run, to the amount of six thousand dollars for each and every mile of said section. But none of said bonds shall be issued to said Company until said Company shall have executed to the city of Louisville and delivered to the Treasurer thereof coupon bonds of said Company having thirty years to run, to an amount equal to the amount proposed to be issued by the city on account of said section, bearing at teast thirty days's carlier date than said city bonds, and payable at the same place, and at least thirty days before them, nor until the punctual payment of the interest and principal of said bonds so issued by a first mortgage upon the effects and all franchises of said Company, appertaining to said branch road, including the road-bed, right of way, bridges, masoury, iron rails, splices, and equipments, and all other property. Said mortgage may, however, secure the principal and interest of other bonds issued or to be issued by said Company, besides those issued to the city, to an annount not exceeding six thousand dollars per mile.

Sec. 2. That the bonds of the city before specified shall not be used by said Company for any other purpose than for procuring iron rails, chairs and spikes for add extinction of said Lebanon Branch road, an compliance with this provision, the Mayor, by and with the advice and consent of the General Council, shall have power to appoint a Commissioner to act in conjunction with the President of said Company in negotiating said bonds for the purpose aforesaid. If, however, there shall be any surplus after any section shall be completed, ready for the rolling stock, the remainder of said six thousand dollars per mile may be applied to the purpose of grading, bridging, and preparing for the rails, the next consecutive section of said road.

Sec. 3. That when said Company shall have fully completed the remaining consecutive section of seventeen and a half miles of said Lebanon Branch road in a substantial manner, as provided for in the first section of this ordinance, with iron rails, weighing not less than one hundred tens per mile, and with good and sifficient ballssting—and shall have provided and put in operation a sufficient equipment for the business offering—and the General Council shall be assured of the fact, as before provided, it shall in like manner cluic the Mayor to asset to said Company like bonds of the city of Louisville to the amount of six thousand dollars for cach and every mile of said additional section of seventeen and a half miles of said Branch road, so prepared as aforesaid and upon like terms and conditions. But should the interest on the bonds issued by said Company to said city, or any part of it, be not paid when it is

sources of revenue mentioned in the eighth section of the sixth article of the charter of the city—a sufficiency to pay said interest as the same shall become due.

Sec. 5. To pay the principal of the bonds issued by the city to said company the bonds received of the Company are pledged, and, should they be insufficient for chart purpose, then there is hereby appropriated of the evenue or said oity—derivable from all the sources of evenue mentioned in the eighth section of the sixth article of the city charter—a sufficient sum to meet the deficiency; and the General Council, by resolution, may, at any time that the same may be deemed advisable, authorize the Mayor to sell the coupon bonds, provided the same can be done at a fair price, and appropriate the proceeds to the liquilation of the bonds of the city issued therefor.

Sec. 6. The whole amount of the city bonds issued by virtue of this ordinance shall not exceed two hundred and seventy five thousand dollars, and said bonds and the bonds of the company issued to the city shall bear interest attherate of six per centum per annum, pay a bic semi-annually in the city of New York.

Sec. 7. None of the bonds authorized to be issued by this ordinance shall be issued unless the first section of said road, shall be fully prepared for the iron rails, as required in the first-section of this ordinance, within one year from the time aforesaid.

Sec. 8. This ordinance shall not take effect until it the second of the constant of the remaining section of said road, unless the prepared as aforesaid, within two years from the time aforesaid.

TERRIBLE EARTHQUAKE IN LOS ANGELES .- On t Tuesday evening our city was thrown into mmotion by the most violent shock of an earth-ake ever before experienced in this country. e walls of some of our most substantial build Some of our merchants have suffered severely om the damage they have sustained, in having heir goods thrown from their shelves, and some of ur brick buildings have been materially injured, although no walls have yet fallen down. The shock occurred precisely at 7% o'clock in the evening, as some pendulum clocks indicated in our jewelry stores, that were stopped by oscillation, and lasted probably not to exceed five seconds. We learn that a shock occurred here in 1847, but were not exceeding the first this. e learn that a snock occurred here in 1941, but is not so violent as this. The shock was felt at a Mission of San Gabriel, at the Monte, and at co-mungo, some forty miles from this city. We are informed that the shock was so violent the Mission that the bells of the church were rown down and the ground cracked open. It is possible to calculate the damage done to build-gs in this city, as all are more or less injured.

MECHANICS' INSTITUTE HALL.-The manager of the Mechanics' Institute are taking considerable pains and going to some expense to refit the Hall for the coming Exhibition. Among the improvements we notice they are suspending a promenade gallery along both sides of the house, conneeting at each end with the galleries built last year. This, while it gives much better opportunities for seeing and enjoying the exhibition, and also affords more room for visitors. We look forward to the coming exhibition as the most magnificent and interesting events Louisville has even had in that particular line.

#### The Future of Louisville-- The Louisville and Nashville Railroad.

It is a question with us, which we are as yet unable to decide, whether Louisville is to have features will be. We confess at present the pros- for the officers and speakers. pect is gloomy-nor have we found the man whose oump of hope was so well developed as to allow him to see any more than we see.

As a traveler through a strange land, upon a oad he has not known before, yet which he must ravel, at starting finds all fair and clear-as in and pertinent preliminary remarks, by Mr. Twyime, storms and clouds come up and darken his man, of the Paducah Democrat, was addressed by way, but leave it open still, as they in turn de- Col. One month ago our prospects as a city were glorious; true, a cloud of hard times hung over us, but our pathway Davis, Hon. Mr. Allen, of the Shawneetown Diswas clear; on "bloody Monday" we came to a turn trict, Ill., and others. in the road—a sudden turn—and ran immediately

one light which dances and coquettes before us, but sailor clings to the broken spar for life, so we cling to that only, which promises any relief-the spar may not save the mariner entirely, nor restore him his overtaxed limbs and keep him from death. So this only proviso of help may keep the city from total rain, without the ability in itself to restore to prosperity. That one pale light, that broken spar, is the Louisville and Nashville Railroad.

It may prove an ignus fatuis, because its completion depends on the will of the people. If they will, it is to be completed-if they say it shall go on, then there is a prospect that our headlong progress to ruin may be stayed; if not, then nothing will save us, and Louisville is doomed to desolation as complete as that of Thebes and Memphis of old. There are, no doubt, some who may think we have painted the picture too black-but what ground have they for hope? If we drop this road first, where is it? If we refuse to extend the aid necessary and which we can do without costing us one cent, what will be the consequence? Nothing less than this. The Lebanon branch will never be finished; the main road to Rolling Fork, although it will be built and put in order, will not do business to justity the sale of such county bonds as are in the Company's possession, except at too great a sacrifice. The enterprise will then fall nestly endeavoring to form a connection. Wall street, N. Y., is watching with keen glance our movments. If we stand to the road, Wall street will advance the money-if we don't, then the Cincinnati and Nashville project will be seized upon and pushed through. Is any one so blind he

Next Saturday an election of the people is to he held to see if they will confirm the ordinance already passed by the Council, lending the city bonds to the Company, to the amount of \$6,000 per mile for the express and only purpose of laying the iron on the Lebanon branch track. The city will not pay one cent, nor a single citizen. The plan is this. The city will issue her bonds, but not until the Council are satisfied that a section of 15 miles is all ready for the iron, and not then unless the Company issue to the city their bonds for the same amount, due at the same place 30 days be fore the city's bonds, and secured by a mortgage upon the entire road-bed, lands, &c., belonging to the branch road.

The bonds of the city and Company have 30 years to ran, and the Company's bonds must be paid 30 days before the city's fall due, as well as the interest on them. The sum asked is only \$6,000 per mile, and that cannot be spent except for the iron and laying it down. The length of the branch is some 371% miles, so that the total sum will be but about \$225,000. Once reach Lebanon, and we have a chance of getting to Knoxville and Charleston, as well as to Nashville and

New Orleans, and Memphis and the Pacific ocean.

Then these giant connections—with the Atlantie; with the Gulf of Mexico and with the Pacifi; -depend on the vote of the people next Saturday, confirming or refusing to confirm the ordinance mentioned. With these, then, great connections, mentioned. With these, then, great connections, all of which are possible, we might entertain a reasonable hope that Louisville will be in a few years restored to the proud position she occupied one month ago—provided we have no more "bloody Mondays." This possible confirmation, is the light dancing before our vision in the darkness enveloping us; if we catch it and fix it to our car, it will light our pathway and may lead in time to prosperity. Who will vote against the ordinance? Not one we trust. We publish it in our advertising columns this morning—read it carefully and attentively.

INDIANAPOLIS, Ang. 29-3 P. M. ase gathering at the Democratic meet ng surprised the most sanguine of the opponents the derk-lantern conspiracy, at its numbers, enthusiasm, and marked determination to redeem Indiana from the embraces of both "Sam" and "Sambo."

The preliminary meeting on last evening, filled the Representative's Hall, at the State House, to overflowing. Numbers were compelled to stand the speeches of the evening.

This meeting was organized by calling the Hon. John W. Davis, late Governor of Oregon, to the Chair, when it was addressed by Gov. #### RIVER AND WEATHER.

RIVER.—The river was at a stand all day yesterday, and last evening with five feet ten inches water in the canal, and four feet on the falls in the pass. Yesterday was clear and pleasant.

PITTSBURG, August 29-P. M. There are 6 feet water in the channel and falling. The weather is clear and pleasant. Tuesday from the Jacob Strader, was found yesterday

The Jacob Strader, incomparably the gree outside, or leave the house, from inability to hear finest boat above the fallsf is the regular packet to-day at noon, for Cincinnati. Don't forget that Capt. The fine and new packet John Bell, will leave this afternoon at 4 o'clock, for Cincinnati. We hope some of our bragging friends up there will take the onble to examine her and see if they can't learn how last and the conquest made by the avowed Aboli- to build and fit out a respectable boat. We will give a description of her in this evening's paper.

The Endeaver will leave this morning for Pitts The Sam Young, another new Pittsburg boat,

came down yesterday and went through the canal. COLLISIONS-HOW MAY THEY BE STOPPED !- What has been the effect of the laws in relation to collision, and for the purpose of preventing their frequency, if not their possibility. So far as we can now call to mind, ns occur about, or nearly as frequently now as before the adoption of the present law, and are attend-

terday on this subject, and he gave us his views, which we intend to use in this article. The reason of the existence, even yet of collision is plain, the level are the collision is plain. selves wrong. We inquired his idea of the working of such a system on the river as is used on turn-pike roads, that is, "keep to the right." It might operate to advan-tage where the channel of the river was wide enough, and where the number of boats passing up and down was small. But, in a river like the Ohio or Mississippi, where there are not only narrow channels, dreds of boats constantly in motion it would not work

For instance: down along the coast, a steamer may be coming up or going down, and may be compelled, as all are sometimes to stop on both sides of the river in a very short trip, perhaps at plantations immediately opposite each other, it would be impossible for her to keep to the right, and equally impossible for the advancing boat to tell whether there would be room to keep to the right, or whether the first intended to stop or not. And then, to say the least of it, the plan recommended by the Cincinnati inspectors has no merit, even if it did is to stop the engines of both boats by the time they come within sight of each other-if by day, say when when half a mile apart-if by night, so soon as they dis over lights advancing ahead. When the engines and wheels are stopped, there is better opportunity for hear do not at first understand each other's signals, they can repeat them two or three times till they do under stand; or in the worst possible case, suppose they ar come within a few feet of each other, no damage can possibly be done, because one single back revolution of the wheels would stop the progress of either boat.

The time lost by such stopping and trying to under meet, the one boing down at 18 miles per hour, the other coming up at 12, would occupy but about one minute in coming together, if a mile apart, and not over three quarters of a minute, if half a mile apart. Then, suppose every boat were compelled to stop thus twenty half an hour, and such a loss as that can bear no comparison to the loss of property or life, consequent on a violent collision. We believe such a plan would work well-we cannot see how it could do otherwise.

The Evansville Enquirer of the 28th, states the the Gazelle, in command of Capt. W. H. Lyon, put up her shingle as a regular passenger packet to Newburg and Henderson. He engaged one pilot and a lot of passengers. While stopping at Newburg under the pretence of going up to the coal banks, got all his pasengers and two pilots on shole, and then put off with his boat. He left some unpaid bills in Evansville, be-sides having borrowed \$20 from a friend. The Enquirer thinks the Gazelle is still going somewhere.

The Evansville Journal says we were mistaken Le gion. n saying the White River had laid up there for the fall season to commence. Perhaps we were, but we are still the Journal itself.

Solp .- We learn that Capt. Dean, on Tuesday, sold \$13,000. She will be re-painted, re-fitted, and put into the regular trade between this city and Pittsburg. We with the C. D. than he was with the K. H. His purchase

stern-wheel boat at Wheeling, intended as a packet be-tween Cincinnati and Nashville, the cabin and machi-

is going to do.

The St. Louis Democrat of the 28th, says that the iver at that point is falling, and is one foot lower than when the late rise commenced.

[From the Evening Edition.]

ARRIVAL OF THE CANADA.

HALIFAX, Aug. 29.
The Canard steamship Canada, from Liverpool, with dates to the 18th inst., arrived here at 4 o'clock this morning. Her news are one week later than our last previous advices. An immense conformation of the control than our last previous advices. An immense con-flagration had prevailed at Sweaborg for forty-nine hours, which destroyed the store-houses, mag-azine and arsenals. The powder magazines and the stores of the projectiles were also blown up. The enemy's loss is enormous. There is nothing said in either the English or French Admiral's dispatch about the Russian ships at Sweaborg. The Allies lost no lives. Two officers and thirty evening, it had floated but a short distance from when men of the English were wounced. The from the seat of war is highly important Russian army under Leprandi had attacked the lines of the Allies at Tchernaya on the morning of the 16th, and after a battle, which lasted three hours, were repulsed by the French and Sardinians, with a reported loss of 5,000 and 400 prisoners. The Canada also brings intelligence of the bombardment of Sweaborg continually from the 9th to the 11th, by the Allied fleets, with an immense destruction of property—but a trifling loss to the Allies. After the bombardment the fleets returned on the 13th to Norgen. The Russian fleet at Sweaborg was not touched. Denmark is reported to have sent a commissioner to ask the advice of France with reference to the repeal of the American vessels to pay sound duties. Gen. Simpson telegraphs that the bombardment of Sevastopol would re-open on the morning of the 17th.
